Creating Water with Photoshop

In this tutorial we will use Adobe Photoshop to create some water.

Firstly create a new document - Im using 400px by 300px for this tutorial however you can of course use whatever size you want.

Change the color swatch to a blue color. This one is #3655B1. Draw rectangle to fit the screen.

Now we want to use some filters on our image to actually make it look like water. Go to Filter >> Noise >> Add Noise. Set the amount to 13% and click OK.

Now go to Filter >> Blur >> Motion Blur. Use the following settings:

Motion Blur			X
			OK Reset
Ξ	100%	+	
<u>A</u> ngle: 3	$\Box \Theta$		
	<u>D</u> istance: 50	pixe	ls

Now go to Filter >> Sketch >> Bas Relief and use the following settings:

Bas Relief	
	OK Reset
- 100% -	Ð
Detail	
Smoothness 3	
Light Direction Bottom	•

Only one more thing to do now. Add another motion blur like we done before however this time set the distance to 15.

Heres my final result:
