

# Instructions for Fire

---

Follow these steps to create text that is on fire.

1. Open Photoshop
2. Select New and create an image 4 inches high and 2 inches wide – keep everything else the same, then click ok
3. Hold the CTRL button down and press the letter “i” to invert the screen from white to black
4. Hold down the text button in the palette and select Horizontal Type Tool
5. Change font size to 72 and choose a font style of your choice
6. Select the Move Tool and position the text at the bottom of the space
7. Select Image, Rotate Canvas, 90 CCW to position the text
8. Click on Filter, Stylize, Wind
9. Click ok to Rasterize the text and then click ok
10. Hold the CTRL button and press the letter “f” to repeat the Wind action
11. Select Image, Rotate Canvas, 90 CW to position the text
12. Click on Filter, Distort, Ripple and click ok
13. Click on Image, Mode, Indexed Color, click ok twice
14. Click on Image, Mode, Color Table
15. From the pull down menu for Table, select “Black Body”
16. Click ok and you’re on fire!
